Hannah

Please add this to my public input to the SMP Update.

Karl

Public Hearing Input- Stolen Freedoms 5/29/11 Memorial Day

I see our powerful central government feverishly creating regulatory laws that curtail our freedoms. The NNL Policy, larger setbacks and buffers, and new forced public access to private property will further erode our freedoms. We the people and private property owners are the frog in the pot which is slowly being brought to a boil. The takers and destroyers continue their relentless incremental taking of our rights and freedoms. Do we wish to be like China or Russia? The SMP Update should be left unchanged or some of the previous 'takings' reversed.

It is Memorial Day. This is a time to reflect on how precious our freedoms and rights really are and what it will be like without them. Today we pay tribute to those courageous men and women who gave their all to secure our freedoms. Sadly we take those freedoms for granted and casually let them be incrementally eroded away. They are being stolen before our eyes by sneak thieves in our governments.

Please wake up Americans. Please act now while stopping this petty tyranny is easy. Please act every day to protect our God given fragile rights and freedoms. Do this on behalf of yourself and your family or your Country so that the sacrifices of our fallen service men and women will not have been in vain.

Karl Spees - CAPR Rep. to SMP Update Advisory
