Comments: Table 1 on page 13 of the County Consistency Review report recommends a regulation that requires a conditional use permit for forest practices in the natural environment. This is not required by the RCW nor the WAC. WAC 173-26-241 only requires conditional use permits when exceptions to the standards in RCW 90.58.150 are not met.
This requirement should not be in the SMP

Additionally, the Consistency Review Document refers to limitations on logging that may go beyond the Forest Practices Act requirements.
It is not clear if this recommendation is asking to allow these additional limitations beyond or to ensure that the limitations do not go beyond the Forest Practices Act.
