Subject: Shoreline Advisory Group - Absent (Please submit as a comment to the SMP Public Comments)

Hanna

In the past 3 days I have developed a moderate to severe respiratory infection. It is the worst that I have had in decades. Unless I make a miraculous recovery, will not be attending the Shoreline Advisory Group.

NNL will have a profound impact on the economics of private property ownership. Conspicuously absent from the report of the first meeting is an accounting of the economical impact. Our property rights are protected by the State Constitution. The environmental problems of the 70's 80's and 90's have been addressed and fixed. NNL has little or no scientific legitimacy. It is a politically quasi scientific agenda. It should be rejected outright. I read in the paper (PDN) recently that our County has received a million dollars from the EPA to foist the NNL on our County. This is borrowed money. Stolen from our bank accounts by the unregulated printing of dollars. Because it was borrowed, it was also stolen from our grandchildren as a debt owed. (Taxation without representation). The NNL is wrong on so many levels it needs to be rejected out right.
