### **CLALLAM COUNTY SHORELINE INVENTORY AND CHARACTERISTIC REPORT**

Based on the "Best Available Science?"

**With the future of our county in your hands**, I urge Sheila Rourke Miller, Steve Grey, the 9 appointed members of the Planning Dept. and our Clallam County Commissioners to read EVERY SMP public comment posted on the SMP website.

Bob Vreeland's excellent comments 9/01/11  
on **18 the marine reaches**

I have great discomfort with the way modifying words are used throughout this document.

Ambiguous, incomplete, misleading, some, partial, majority, informal, limited, conflicting, several, missing, ignored, consistency, factual, current, complete/accurate?

Bob suggests,

that the modifying words be replaced by the more accurate (precise) information.

I agree with Bob 100%

Pearl Rains Hewett's documented comments, several  
on the **18 marine reaches**  
and **64 fresh water reaches**

My documented spreadsheet comments

Taken from Clallam County's Shoreline and Characteristic report

Public access to Public land and the taking of Private property on the 82 fresh water and marine reaches.

The 82 contaminated and impaired, fresh water and marine reaches.

**The one thing that is consistent in the 82 fresh and marine water reach reports is the use of modifying words instead of complete factual information.**

Of what use is the limited information?

Many times the photo/map summary sheets provide more detail than the text.

The large maps **provide different information than the text.**  
Should the reader **REALLY** have to look at all three sources and then wonder **which is the correct and most accurate data?**
