Noxious Weed Control - LMD#2 Lake Sutherland

13051.381.

If WA State owns Lake Sutherland AND WA State DNR manages (controls) Lake Sutherland

WHO should be paying to protect Lake Sutherland's beneficial uses, water quality and wildlife habitat from the degrading effects of Eurasian Water milfoil?

Why is this program being **funded by an assessment self-imposed by landowners** within the

boundaries of the Lake Sutherland Management District 2?

Washington State Department of Natural Resources (DNR)

360-902-1152 Lalena.Amiotte@dnr.wa.gov ww.dnr.wa.gov

C1U1pter 6- Freshwater Reaches

• Section 6.7 Lake Sutherland- page 6-16, lines 3-7- **much of the shorelands and all the bedlands**

in Lake Sutherland are state owned aquatic lands managed by DNR . Please reference this

information in this section. **Incidentally, many of the docks and other development may**

encroach onto State owned aquatic lands without proper DNR authorization.

Certainly, if MUCH of the Shorelands of Lake Sutherland are owned and controlled by WA STATE.

Much of the financial responsibility to control Eurasian Water milfoil should be paid by the WA State.
