Subject: Shoreline Master Plan (specifically Marine Dr. from Cays Rd to Twin View)

Dear Sirs and Sheila,

We are residents at [REDACTED] Marine Dr. We have been contacted by our neighbors regarding the **SMP**. First, let me say, I have worked with Clallam County Building Department, Community Development, Assessor's Office etc. over the last 20 years, and feel that we have been treated fairly, and efficiently. I would like to propose an idea that may be good for the county, the residents, and the Cottage business owners.

We all know that Marine Drive is subject to slides by either the whims of nature and/or by the heavy construction vehicles. Such an occurrence may be beyond what the collective homeowners could pay for, and since Clallam County is as cash strapped as most in America I propose the following:

1. At the intersection of Anderson and Cays Rd. Marine Drive becomes a one way street with the driving lane on the right side.
2. The left side would be cut in half with a bike lane, next to the currently existing double yellow line, in the center and the remaining would be a pedestrian lane.
3. This format continues to the intersection at Marine Drive and Twin View.

This solution would require only road striping, lettering, and signage, hopefully with additional speed limit and appropriate "one-way" and caution signs, for biking and foot traffic. Finally, regardless of how you proceed on the designation, my suggestion should be adopted on the grounds that it is immediately beneficial to the county and the land owners. I further suggest that the speed limit be reduced to 20 mph, so that those that do 35-45 may slow down a little.

Thank you for your consideration.

Sincerely,

Gordon and Sharon Chance
