Regarding the Shoreline Master Plan, I would like to state that my family and I have owned the property at [redacted] Marine Drive for approximately 30 years. We do not have a high bluff, nor is it steep, nor is it seriously eroded. We have protection because we are enclosed by the Dungeness Spit, Clive Spit and Shaws Point Spit.

I have enjoyed many walks on the beach in Dungeness Bay season after season, for many years and it has been my pleasure to observe how stable our lower bluffs have been over time, due to the relative quiet action of the water inside the bay.

We home owners of Marine Drive feel we do not merit the label "priority feeder bluff" instead we feel we should be designated as "bay".

Thank you for your time and consideration.

Sincerely,  
Patricia Merritt
