Subject: Clallam County SMA/SMP Update Comment by Karl Spees

The SMA/SMP Update represents a terribly expensive, economically damaging agenda imposed by a remote government non-elected agency (DoE surrogate of Madam Gregiore) who are **not acting on behalf of the State's citizens.** 

The SMA/SMP Update Committee is made up of about 1/3 paid Tribal representatives (this group is unaffected), 1/3 paid government agency employees (They are not affected. - They have no skin in the game.), and 1/3 private property owners (they are non-homogeneous). [Pearl is clearly the most informed private property owner.] This is Statist Dogma/Agenda being imposed on us by a

self-serving remote government. Those most affected are least

## represented.

This SMA/SMP is extremely convoluted, a blank check for the STATISTS. It should be rejected and the old plan needs to be retained.
