**Subject:** SMP Comment Restoration and WETLANDS

**SMP Comment on  
Restoration and WETLANDS  
Pearl Rains Hewett Trustee  
George C. Rains Sr. Estate  
Member SMP Update Committee**

**Restoration is NOT required by law.  
ESA has provided an entire section devoted to Restoration?**

**It is time to IDENTIFY PRIVATE PROPERTY WETLANDS.**

-----

## **IDENTIFICATION OF ALL CLALLAM COUNTY PRIVATE WETLANDS IS AVAILABLE**

**One of the first obligations, Clallam County committed to, was the notification of all private property owners affected by the SMP Update?**

### **CLALLAM COUNTY WETLAND MAPS IDENTIFY**

**Since parcels and WETLANDS are too small and numerous to label legibly at this scale, they are identified with tiny labels. To view wetland codes and large parcel numbers, you must zoom to at least 400%. To view small parcel labels, you must zoom to at least 1200%.**

**The printed wetland information by parcel number, the tiny label information and wetland codes must have appeared in a written Clallam County summary document prior to becoming identification on the maps? (not found online?)**

### **DOCUMENTED WETLAND PARCELS (as identified above)**

**I am requesting that Clallam County Planning Dept. provide their written documented summary and a legible print out of the small and numerous WETLAND parcels identified by tiny labels, their WETLAND codes and the notification of all private property owners affected by WETLANDS on the SMP Update.**

**It is disappointing that with this WETLAND information available, the county has not fulfilled its commitment to notify SMP private property owners affected by WETLANDS.**
