SMA/SMP Update Comment - Justification of Style March 2013

Comment on the Clallam County (CC) SMA/SMP Update Comment are exceptionally good and diverse largely due to the contributions of Pearl Rains Hewett. During a conversation with Pearl concerning my latest two SMA/SMP Update Comment Comments she related that they were ‘rants’ in contrast to her comments which were legal research and documentation.

One major difference in the positions of Pearl (majority opinion) and my own (minority opinion), Pearl seems to accept (false assumption) the ‘DoE imposed SMA/SMP Update’ as a legitimate creation of policy and law which just needs tweaking and my position that the Clallam County SMA/SMP Update is an onerous imposition of illegitimate regulations from a hostile remote governance. The SMA/SMP Update is absolutely contrary to the State Constitution, ‘preserving the individual rights of the citizens’.

Pearl has a unique ability and exceptional grasp of the law and ability to research issues related to the SMA/SMP Update. My strengths are Natural History, science, political history, transaction analysis, and political dynamics and my weakness, a shallow grasp and understanding of law and legal precedence. For whatever reasons these strengths seem to annoy Pearl (and I’m sure others).

One of my next comments will be related to the ‘Big Lie’ ‘Man Made Global Warming’ (MMGW) and how this relates to our CC SMA/SMP Update Comment/Process. This comes from an/my understanding of the fundamental Science and (Climate) Natural History. This is on a rock solid objective science and natural history foundation and is in stark contrast to the ‘conventional wisdom’/‘urban legend’/media brainwashing/partisan agenda which is the false basis for the major opinion of a large number of low information politicians/legislators and general population. (The ‘Big Lie’ that man’s use of wood and fossil fuel as an affordable energy source is causing global climate harm is the ‘holy grail’ of UN Agenda 21. Both Democrats and some Republicans have bought-into this fraudulent/false non-science.)

It is our good fortune that Pearl and I have different expertise that we bring to the Shoreline Update process. It is unfortunate that those most adversely affected by these unnecessary DoE imposed policies/regulations aren't aware of the damage caused and coming. ('Most affected; least represented')

Karl Spees, MD (retired) Student of Natural History, SMP Update Cmte
