SMA/SMP Update - Corrupt Transformation of Good Intentions

When the citizens adopted the Shoreline Management Act in the 70's it sounded like a good idea. In the 50's, 60's, and 70's there were some real environmental problems that could only be addressed by our State government. Those problems have been largely addressed and resolved by prior laws and policies. Many times the issues have been fixed by redundancy of laws. The SMA/SMP Update, this time, is just an opportunity for corrupt progressive governmental officials to achieve unacceptable things they could otherwise not achieve.

The corrupt transformation of the SMA/SMP Update into a political overreaching agenda is not happening in a political vacuum. It has purposefully designed objectives which have nothing to do with acting on behalf of the citizens (Constitutional) or the environment. (Some of the dogma may well damage the environment much more than it helps. The environment is a convenient ruse.) It is a ruse, just like the fraudulent ruse/gimmick of the United Nations' dogma of Man Made Global Warming and climate change (MMGW).

Connecting the dots and putting isolated pieces of the puzzle together is becoming more evident even for the 'medium information voter'. Governments seeking to overreach and gain absolute control must use fraud and thuggish force (legal and technical experts paid for out of the public treasury) to advance their agenda. Those who do not study history are subject to repeat it. As preparation for Hitler's Germany invading Europe, Scandinavia, etc. his diplomats went around to the various nations and signed 'understandings of non-aggression' pacts. Today we have our Neville Chamberlains who refused to believe the obvious. For too long Winston Churchill warned Britain and the subsequent allies of the looming treachery. Also today we have our collaborator Vidkun Quisling's who promote this 'junk' from within the system. (It is time for us to use the lessons of history. It is time to say NO MORE!)

Social and political events don't happen in a vacuum. Progressives TAKE in small increments to avoid attention and opposition. We have Christine Gregoire. She was WA Attorney General when Jessie Jackson shook-down Boeing for half million dollars (extorted). She was the head wonk of the Dept. of Ecology before she was 'elected' governor after Seattle's 'third count of the votes'.

Since her 'election'; her surrogate, the DoE, has been serially tracking over the counties of the State imposing controls (taking by regulations) of the common water resources, SHORELINE PROPERTY use, and the private property rights of the citizens via environmental, non-governmentals, and Tribal voodoo. It can be reasonably speculated the SMA/SMP Update is just one of her/their insidious schemes. Christine Gregoire's was considered as a department head for the Obama regime which is more subtle proof of her duplicity in the malignant expansion of central governmental power and control (fundamentally transformation). If she were a 'boob' (which she is not), one would see her obvious finger prints on all this chicanery.

Governor Jay Inslee (D) is tracking in Christine Gregoire's radical agenda of growing Statist power by the use of more obvious fallacious 'new science'. The central focus of Jay Inslee's government is addressing (artificial crisis) production of 'greenhouse gas' 'man made global warming and climate change' by artificial government controls of our affordable energy supply, burning of wood and fossil fuels. (Obama's new pick for Sec. of the Interior, WA State's citizen Sally Jewell wisely skirts the issue of fossil fuel as public enemy number one). It just happens that United Nations 'holy grail' foundation/pretext/premise (UN Agenda 21) for imposing a one world governance of the elitists is a scheme base on taxing/controlling CO2 as a 'greenhouse gas' causing MMGW.

Man substantively affecting the climate is not supported by SCIENCE. Human activities affecting the climate is an artificial construct and the Holy Grail of UN Agenda 21 and government/political fraud. We are post University of East Anglia scandal. There are multiple legitimate sources where the basic science of 'disproving' the voodoo of MMGW are available. The fraud/fallacy of MMGW are explained in ways even a high profile JOCK should be able to understand.

The Low Accountable Media - Low Information Press (LAME - LIP) have repeated the lie of MMGW so often the low information voters/readers/legislators/politicians are brainwashed and believers. One expects the governor of a state to be held to a higher standard. Jay Inslee is either stupid, slovenly (lacking due diligence), disingenuous or out-and-out dishonesty. Perhaps Gov. Jay Inslee is not as stupid as he appears; perhaps he is just corrupt and jockeying for a position in Al Gore and 'elitist' gangs or a UN Agenda 21 sympathizers and collaborators. Regardless of the basis/motivation for his apparent belief system, it is unscientific/incorrect/fallacious, terribly unnecessarily, and destructive of our economy/society.

Since we have an elected State Governor who is tracking in the unscrupulous path of Christine Gregoire using the false science of UN Agenda 21, it is unlikely that the DoE will change its tact. Our local elected public official need properly educate themselves and reject the adoption of the State imposed dogma (fraud) of the SMA/SMP Update. [Despite the scandal of Solyndra, President Obama (the quintessential slick politician) seems to be doubling-down on Stupid and continues to push the non-science of MMGW.] For Obama, he could care less about the science. It's the best gimmick he's got going to achieve his dishonest and destructive objectives. (Gov. Inslee may just be a gullible partisan lackey follower.) These people are up-to-no-good.

In our high school science class someone told one of our JOCKS if he squeezed the "C-Cell Batteries" he could get more juice out of them. He bought this BS (Bull Scat). In general I don't subscribe to Urban Legends and Conventional Wisdom. With Jay Inslee's embracing the basic

Non-Science of CO2 mediate weather change, it's time to revisit the concept of 'all JOCKS are STUPID'. Don't fall for the BS, Obama, the Statist Media, and Gov. Inslee are pimping.

Jay Inslee and Al Gore come across as JOCKS. 'If it looks like a duck, walks like a duck, and quacks like a duck; it is a DUCK'. Gov. Jay Inslee does not seem to have the deft touch for governmental chicanery (confidence scheme) as exhibited by Gov. Gregoire.

It is difficult to stand-up under the considerable pressure to adopt the current SMA/SMP Update draft but it is very import that you do so. Someday sane/honest/representative government and government agents (the adults) will be back in-charge of our Constitutional State Government. High ranking officials using their fiduciary power dishonestly or foolishly is unacceptable. Misguided leaders are extremely damaging to the well being of the citizens. (Another 'Detroit' or worse is the logical extension when these corrupt partisan operatives are left unchecked and progress to their logical conclusion.) We are in economic distress. We are not in an environmental crisis. Gov. Inslee's posture and the DoE's will surely make things much worse. (First do no harm!)

The drivers which seem to be promoting the SMA/SMP Update riding rough shod over our individual rights are the I-5 Corridor voter elected bureaucrats, Statist academic cult earth-worshippers, tax-funded hired technocrats, radical environmentalists, unaffected paid self-serving Tribal representative, and State agency puppets using hypothetical language and schemes. Violating 'Social Norms' is very difficult. Regardless our local leaders need to say NO to these (corrupt) authoritarians. It is extremely important that our local officials not contribute to this misguided policy. Rejection ostensibly legitimate talented experts is very difficult but essential. These 'slickers' are selling a 'bill of goods'. For the above reasons and more, please do not adopt the DoE imposed SMA/SMP Update. Keep the old 'plan' unchanged.

All of this could be said in fewer words. This is a ship load of 'baloney' being imposed by the unelected non-representative Dept. of Ecology. You should just tell them, NO!

Karl Spees, MD (retired) Student of Natural History, Member of Shoreline Update Cmtee

For a visceral and interesting way to understand the fraud of CO2 mediate MMGW (fossil fuel use) read [The Carbon Trap](#) by Randy Dutton.
