Subject: B.C. government to freeze new net-pen salmon farms in Discovery Islands until 2020

Dear Citizens Interested in Harmful Salmon Net Pen Aquaculture,
At a time when no new net pen aquaculture will be allowed in BC/Discovery Islands until 2020, the Washington State Department of Ecology should stop their lobbying along side the aquaculture industry to expand net pen aquaculture here.

It was disheartening to say the least to watch Ecology representatives testify against HB1599 which would have allowed counties to prohibit net pen aquaculture in their Shoreline Master Program updates. There is a major

disconnect where Ecology is using the SMP update to protect the uplands and at the same time paving the way for unprecedented expansion of both finfish and shellfish aquaculture in our marine waters.
