Subject: use of yard chemicals in buffer zones

Hi,

I would really like to see a ban on the use of yard-related herbicides and pesticides within buffer zones near aquatic areas.

Most waterfront property owners are considerate of the environment, but there are some who use a lot of chemicals and/or have underground storm water lines from herbicide-soaked gravel driveways that dump directly into the bay.

If there is such a ban, maybe these homeowners will feel less social pressure to exterminate every weed.

Thank you,

Marian Morris
