Subject: shellfish farm

To whom it may concern,

In the interest of preserving the natural functioning of the ecosystems in Dungeness Bay I oppose this shellfish project by Taylor Farms. Being across from the wildlife refuge and the mouth of the Dungeness River this is not an appropriate place for a shell fish farm. I thought the state and county were in the business of restoring shoreline and wildlife habitat not allowing for disturbing acres of beach with PVC pipes, large canopy nets, and harvesting with high pressure water. This would be poor shoreline management! I hope the proposal is denied.

Sincerely,

Terry Sage
