Comments: At the January Sequim town hall on the plan the staff presented those lands that are excluded from this regulation. But no specifics were provided on what tribal owned lands are regulated?

This needs to be fully explained as to whether that exception is for just those lands that are reserved by the US Congress or also includes any lands owned by the tribes. I believe the draft maps, you call them SED maps, are incorrect because I believe you are posting all tribal owned lands versus I believe the exception should only apply to those lands that are Federally reserved by an act of Congress or Presidential decree. The plan's language needs to be clarified and the maps corrected.
