Subject: Weather Balance By God

This includes **US Climate Change Study Explores Weather Modification** I am sending it as a public comment on Clallam County SMP Update.

Weather Balance By God

Posted on April 20, 2015 11:03 am by Pearl Rains Hewett [Comment](#)

Weather Balance By God

(Psalms 135:7). This one verse clearly outlines four aspects of the NATURAL hydrologic cycle: evaporation, wind, electricity, and rain.

So what's next for **GLOBAL WEATHER MODIFICATION?**

US Climate Change Study Explores Weather Modification

Hmmm... after 3000 years of "THE NATURAL HYDROLOGIC CYCLE?" AND AFTER (41) Global Governments have been attempting to modify, and change the weather in various forms for about the last 70 years?

NOW AFTER 70 YEARS, OF MODIFYING GLOBAL WEATHER? THE UNITED STATE IS FINALLY GOING TO STUDY IT?

Lord, what fools those mortals be...

I am compelled to post this document "Weather Balance By God"

Ecclesiastes 1:6-7, "*The wind blows to the south and turns to the north; round and round it goes, ever returning on its course. All streams flow into the sea, yet the sea is never full. To the place the streams come from, there they return again.*"

Here King Solomon, **writing 3,000 years ago** explains how the oceans are the origin of rain. tells us the wind has currents. This was unknown to man,

TODAY SCIENCE HAS DOCUMENTED THE DIRECTION OF WIND CURRENTS AND WIND PATHS.

METEOROLOGY OR THE CIRCULATION OF WINDS MOVE BY FIXED LAWS,

speaks of global wind currents and the earth's water cycle. "The phrase, 'the wind blows to the south and turns to the north; round and round it goes, ever returning on its course' is an accurate and astonishing description of

the circular flow of air around the earth, called the 'JET STREAM,' well known to anyone who watches the evening news weather reports"(also in Isaiah 40:12.)

THIS IS ONLY A RECENT UNDERSTANDING OF SCIENTISTS.

As part of the cycle, an electrical field generates within a cloud and acts as a kind of magnetic glue that causes the water particles to adhere to one another. The same field also produces lightning. “He makes clouds rise from the ends of the earth,” writes the psalmist, **“he sends lightning with the rain and brings out the wind from his storehouses” (Psalms 135:7).** This one verse clearly outlines four aspects of the hydrologic cycle: evaporation, wind, electricity, and rain.

God “sends lightning with the rain,” Jeremiah says on two separate occasions (Jeremiah 10:13; 51:16). The important emphasis in each case is that rain and electricity are linked.

Hmmm... after 3000 years of “THE NATURAL HYDROLOGIC CYCLE?” (41) Global Governments have been attempting to modify, and change the weather in various forms for about the last 70 years.

SO, IN A PROVERBIAL SENSE, ROBBING WATER FROM PETER TO RAIN ON PAUL.

WHY? because with global WEATHER MODIFICATION in 41 COUNTRIES around the world and cloud seeding, EARTH’S NATURAL WATER CYCLE HAS BEEN DISRUPTED FOR ABOUT 70 YEARS, the place the streams come from, shall not return again.

So what’s next for weather modification?

US Climate Change Study Explores Weather Modification

“In its report, **THE STUDY COMMITTEE INCLUDES EXPERTS?** in oceanography, earth sciences, environmental sciences, remote sensing, global ecology, marine chemistry and geochemistry, public policy, **HISTORY OF SCIENCE**, atmospheric and climate science and national security **MAY BRIEFLY DISCUSS** weather modification as a **HISTORICAL EXAMPLE** and draw on ‘lessons learned,’” Rugani said.

THE STUDY COMMITTEE INCLUDES HISTORY OF SCIENCE EXPERTS?

ARE THEY EXPERTS ON THE 3,000 YEAR HISTORY OF “THE NATURAL HYDROLOGIC CYCLE?”

AccuWeather

Aug 15, 2013 – The Chinese government used its *weather modification* branch to work ... **WINTER PROGRAMS GENERALLY HAVE SNOWPACK CRITERIA BY WHICH SEEDING MAY BE SUSPENDED, based on ... “Because global warming may impact the security of other countries ...** The U.S. study is expected to be finished in the fall of 2014.

Mark Leberfinger, AccuWeather.com Staff Writer

A U.S. STUDY is under way to evaluate several possible ways **TO LIMIT CLIMATE CHANGE** including solar radiation management and carbon dioxide removal.

The study will primarily be an analysis of peer-reviewed literature, and will not involve any substantial new research, experimentation, or development of new geoengineering technology, spokeswoman Lauren Rugani of the National Academy of Sciences said.

“The project’s main goal is to provide a technical evaluation of proposed geoengineering techniques such as carbon dioxide removal and solar radiation management,

TO DETERMINE WHAT WE KNOW AND DON’T KNOW ABOUT THEIR PHYSICAL CAPABILITIES, TECHNICAL FEASIBILITIES, KNOWN RISKS, AND INTENDED OR UNINTENDED CONSEQUENCES,” Rugani said.

The evaluation would include general comments on how using such technology may impact the environment, economy and national security. **THE STUDY COMMITTEE INCLUDES EXPERTS** in oceanography, earth sciences, environmental sciences, remote sensing, global ecology, marine chemistry and geochemistry, public policy, history of science, atmospheric and climate science and national security, Rugani said.

Most of the proposed geoengineering techniques for solar radiation management and carbon dioxide removal being discussed have GLOBAL IMPLICATIONS and are generally discussed in a GLOBAL CONTEXT, Rugani said.

“The study may discuss **what is known about regional effects** from various proposed techniques, but that will depend what peer-reviewed literature is available on those effects,” she said.

The project is supported by the Academy, the U.S. intelligence community, the National Oceanic and Atmospheric Administration and NASA.

Changing the Weather

Attempts to change the weather have taken on various forms for about 70 years.

Agencies have used cloud seeding to bring rain and snow to parched areas of the western United States. **The U.S. government tried to research and modify hurricanes from the early 1960s to the mid-80s, an effort that was unsuccessful.**

Indonesia used cloud seeding in June to help douse forest fires. The Chinese government used its weather modification branch to work on a rain-free Beijing Olympics in 2008.

So what’s next for weather modification?

“In its report, the committee may briefly discuss weather modification as a historical example and draw on ‘lessons learned,’” Rugani said.

Weather modification is the process of modifying the weather to enhance rainfall and/or suppress hail with the use of glaciogenic (silver iodide) and/or hygroscopic (calcium chloride) material, Project Meteorologist Jonathan Jennings of the West Texas Weather Modification Association said.

Aircraft or ground base generators are used to deliver the materials into the clouds, he said.

“In Texas, our operations are conducted by seeding at the base of a convective thunderstorm with an aircraft. Our pilots and meteorologists (on the ground) work together via radio contact to identify target clouds and areas of inflow,” Jennings said.

“We rely on the inflow to transport our material into the areas of the cloud that the material is expected to impact. The meteorologists are licensed by the state of Texas to perform these operations. The main tools used are satellite imagery and radar via a program called TITAN (Thunderstorm Identification, Tracking, Analysis and Nowcasting) supported by the National Center for Atmospheric Research.”

Safeguards are in place to curtail or stop cloud-seeding programs on predetermined criteria.

“For example, on our program in North Dakota we do not seed storms that are producing a funnel cloud or tornado, and we also suspend operations during flash flooding situations. Winter programs generally have snowpack criteria by which seeding may be suspended, based on the percentage of normal precipitation and how far along they are in the snow season,” said Darin Langerud, director of the North Dakota Atmospheric Resource Board, who is part of the North American Weather Modification Council.

Cloud seeding produces no significant environmental effects but does enhance precipitation by 5 to 15 percent and can reduce crop-hail damage by 40 to 45 percent, Langerud said.

“The economic benefits of increasing precipitation and reducing hail damage are too numerous to list, but in general, the benefits of extra water in the form of rain and snow and reduced crop-hail damage produced from cloud seeding far outweigh the costs,” he said. “Water produced from cloud seeding can cost as little as a few dollars per acre-foot. Desalination, for example, produces an acre-foot of water for roughly between \$500 to \$2,000 per acre-foot.”

Besides the United States, forty-two other nations have weather modification programs, according to a report released in July by the EXPERT Team on Weather Modification Research of the World Meteorological Organization.

WEATHER WARFARE IS BANNED UNDER A 1980 TREATY TO WHICH THE U.S. IS A SIGNATORY, “BUT” the U.S. intelligence community definitely has an interest in such technologies, said John E. Pike, director of GlobalSecurity.org, a security think tank in Alexandria, Va.

“Because global warming may impact the security of other countries and CREATE PROBLEMS FOR THE U.S. GOVERNMENT,” Pike said. One national security benefit would be to prevent state failure in Africa, particularly in a nation such as Somalia, which has suffered through famine and a long-term civil war.

It also would be perfectly ethical for the U.S. government to use weather modification to save lives and money, Pike said.

August 15, 2013; 12:06 PM ET Workers load sacks of salt that will be used for cloud seeding to induce rain to battle forest fire into an Indonesian Air Force cargo plane at Roesmin Nurjadin airbase in Pekanbaru, Riau province, Saturday, June 22, 2013. Indonesia has dispatched planes and helicopters to battle raging fires blamed for hazardous levels of smoky haze in neighboring Singapore and Malaysia. (AP Photo/Rony Muharrman)

The U.S. study is expected to be finished in the fall of 2014.

Balance By God! (Weather Balance By God)

Posted on October 6, 2014 7:40 am by Pearl Rains Hewett

God sighed a deep sigh of satisfaction, and proudly pointed downwards through the clouds, "It's a planet," said God, "and I've put Life on it. I'm going to call it Earth and it's going to be a great place of balance."

"Balance in all things," God continued pointing to different countries. "This one will be extremely hot, while this one will be very cold and covered in ice."

Some truths, too painful or too likely to provoke?

U.S. Weather Modification Nov. 1966 (I posted it yesterday)

I got up this morning... and remembered...

God said, "There is another Washington..... wait til you see the idiots I put there."

WEATHER MODIFICATION ICAS Report No. 10a November 1966

http://www.geoengineeringwatch.org/documents/19680002906_1968002906.pdf

I loved "Balance by God" it's about Washington State, the place where I was born and have lived for all of my 73 years of life.

Washington State "**WAS**" the most glorious place on earth.

WINTER PROGRAMS GENERALLY HAVE SNOWPACK CRITERIA BY WHICH SEEDING MAY BE SUSPENDED?

What is known about regional effects?

Washington Drought 2015 | Washington State Department ...

Balance By God!

Posted on October 6, 2014 7:40 am by Pearl Rains Hewett *Comment*

“Many a true word is spoken in jest” and “Some truths, too painful or too likely to provoke, can be spoken only when the listener has been disarmed by laughter”

BALANCE BY GOD

Once upon a time, God was missing for six days.

Eventually, Michael, the Archangel, found him, resting on the seventh day. He inquired of God. “Where have you been?”

God sighed a deep sigh of satisfaction, and proudly pointed downwards through the clouds, “Look, Michael. Look what I’ve made.”

Archangel Michael looked puzzled, and said, “What is it?”

“It’s a planet,” replied God, “and I’ve put Life on it. I’m going to call it Earth and it’s going to be a great place of balance.”

“Balance?” inquired Michael, still confused. God explained, pointing to different parts of earth. “For example, northern Europe will be a place of great opportunity and wealth, while southern Europe is going to be poor. Over there I’ve placed a continent of white people, and over there is a continent of black people.” “Balance in all things,” God continued pointing to different countries.

“This one will be extremely hot, while this one will be very cold and covered in ice.”

The Archangel, impressed by God’s work, then pointed to a land mass and said, “What’s that one?”

Ah,” said God “That’s Washington State, the most glorious place on earth. There are beautiful streams, hills, and forests. The people from Washington State are going to be handsome, modest, intelligent and humorous, and they are going to be found traveling the world. They will be extremely sociable, hardworking, high achieving, and they will be known throughout the world as diplomats, and carriers of peace.”

Michael gasped in wonder and admiration, but then proclaimed, “What about balance, God? You said there would be balance.”

God smiled, “There is another Washington..... wait til you see the idiots I put there.”

Author unknown

God smiled, “There is another Washington..... wait til you see the idiots I put there.”
