Subject: Shoreline Master Program - Aquaculture Component

Comments: To Whom it May Concern:

As we enter into the final review stages of the SMP, I think it would be useful to host a forum for the Commissioners and staff to look at the science and operational practices behind net pen aquaculture. I think it would be a good opportunity to review the up-to-date findings and address some concerns.

I have attended a couple of these workshops in the past and believe that, if asked, experts from the state and NOAA would be willing to participate.

Best,

Alan Cook
