

### Forks Address Grid

The Forks address grid is bounded on the north by the Calawah River, and on the south by S. Forks Ave (SR 101) and the foothills, excluding O Joans and Sportsmans Club Roads. The eastern boundary follows Elk Creek to Calawah Way, then the section line between sections 2 and 3, and sections 10 and 11. The western boundary roughly bisects sections 8 and 17, crossing Bogachiel Way to exclude only Zepeda Rd and Evergreen Loop.

Addresses on both Bogachiel Way and Calawah Way will use false origins where they leave the Forks address grid, in order to provide a continuous transition to the rural milepost addresses beyond that point. Bogachiel Way will continue with even addresses on the south, and odd addresses on the North, as established in the Forks grid, the reverse of normal rural addresses.
