The Olympic National Park, cities, or lands held in trust by the U.S. for Indian Tribes.

The full jurisdictional extent also includes critical areas and their protective buffers overlapping shorelands. The County SMP does not apply within associated wetlands. The mapped jurisdictional extent is based on the approximate location of areas within 200 feet of the ordinary high water mark (OHWM) and floodway, 100-year floodplain, and shoreline stream corridor. The SMP applies to streams (or segments thereof) that are longer than 100 feet with a mean annual flow of 20 cubic feet per second (cfs) or greater than 100 feet, and marine waters, together with their underlying lands and associated shorelands. The mapped jurisdictional area is based on the approximate location of areas within 200 feet of the ordinary high water mark (OHWM) and floodway, 100-year floodplain, and associated elements. The risk assessment and mapping process includes both area and data points for each Shoreline Environmental Designation (SED), including the Olympic National Park, cities, or lands held in trust by the U.S. for Indian Tribes.

The mapped jurisdictional area and site-specific information require professional judgment and the Olympic National Forest, Olympic National Park, Tribal Land, State and County Parks, Zoological Area. The SED resource conservation area is subject to the Olympic National Park, cities, or lands held in trust by the U.S. for Indian Tribes.
