Shoreline Environmental Designations (SED) Map

Map 4

Data Sources: Clallam County, 2011 Orthophoto, Channel Migration Zone (Ecology 2013), Coastal Bluffs, Unstable Bluffs (Wa. State Coastal Atlas), Feeder Bluffs (Coastal Geologic Services 2012) and 20 cfs points (US Geological Survey)

Clallam County Dept. of Community Development - August 2013

About the Map

Shoreline Environmental Designations provide a framework for SMP policies and regulations based on their characteristic. The SMP applies to streams or segments thereof with a mean annual flow of 20 cfs or greater than 20 acres, and marine waters, together with their underlying lands and associated shorelands. The mapped jurisdictional extent is based on the approximate location of areas within 200 feet of the ordinary high water mark (OHWM) and floodway, 100-year floodplain, and associated wetlands. The full jurisdictional extent also includes critical areas and their associated wetlands. Site-specific information.

- Natural SED
- Resource Conservation SED
- Shoreline Residential-Conservancy SED
- Shoreline Residential-Intensive SED
- Marine Waterfront SED
- Aquatic (includes marine waters) SED
- Feeder Bluff - Exceptional
- Feeder Bluffs - Other
- Other Unstable Bluffs
